

Ms. Dora Robertson,

I am planning to research Eudora Welty's work as a Junior Publicity Agent with the Works Project Administration (1936). I have started doing some research into the microfilm documents of the WPA. I am hoping to inter-library loan many of these microfilms, which are located in College Park, MD, Washington, DC, and Atlanta, GA, for further research.

I am hoping to be able to identify memos, news releases, and various other documents as being authored by Ms. Welty. She was the Junior Publicity Agent under Louis Johnson (Senior Publicity Agent) and I have discovered an interview with Ms. Welty where she provides information as to the tasks divided up amongst the two agents. This will take intense investigation and I am hoping to be able to receive assistance from the Library of Congress librarians/ Mississippi Archives librarians/ and various other information professionals.

This will be an interesting historical topic to pursue and I am looking forward to beginning the research process.
